

Digital Manufacturing (Output) Pre-Study — 10 Hour Plan

(3D printer slicing & post-processing, mapped to internship Table 1 — 디지털 제조(출력) row)

Internship table field	Value
Area	디지털 제조 (출력)
Class hours	10h
On-site work	3D프린터 슬라이싱·출력·후처리 (slicing, printing, post-processing)
Matching subject	None — no regular course covers this; self-study track
Grade	–
Content covered	(self-defined below, since the table has no 교과 content listed)

Since there's no matching official subject for this row, this pack is built directly from the **현장 업무 내용 (on-site work)** column instead: slicing, printing, and post-processing. It picks up right where `cad-design-prep/` leaves off — you'll use the STL files exported in that pack's Session 5.

Coverage map

On-site task	Covered in
Slicer setup & basic settings	Session 1
Print-quality settings & troubleshooting	Session 2
Orientation & supports	Session 3
Post-processing (removal, cleanup, finishing)	Session 4
Full slicing → print → post-process, end to end	Session 5

Folder structure

```
3d-printing-prep/
├─ README.md
├─ session-01-slicer-basics/          <- Slicer UI, first slice (2h)
│   └─ notes.md
├─ session-02-print-settings-troubleshooting/ <- Layer height, infill, common defects (2h)
│   └─ notes.md
├─ session-03-orientation-supports/      <- Orientation, overhangs, supports (2h)
│   └─ notes.md
├─ session-04-post-processing/           <- Removal, cleanup, finishing (2h)
│   └─ notes.md
├─ session-05-capstone-print-job/        <- Full run on your CAD enclosure (2h)
│   └─ notes.md
└─ progress-tracker.md
```

How to use

1. Install a slicer — **PrusaSlicer**, **Cura**, or **Bambu Studio** (whichever matches your lab's printer). Notes below are written slicer-agnostic where possible.
2. If you don't have printer access yet, do Sessions 1–4 entirely in the slicer's preview mode (you can inspect layers, supports, and time/material estimates without printing).

3. Session 5 uses the STL files from `cad-design-prep/session-05-capstone-part-export/` — do that pack first, or substitute any small STL you have.
4. Tick off `progress-tracker.md` as you finish each session.

What “10 hours” means here

5 sessions × 2 hours = 10 hours, matching the table’s 수업시수. Split into 1-hour blocks (concept, then hands-on) if that fits your schedule better.
