
✓ Progress Tracker — 10시간 AI 활용 사전학습

Session 1 (2h) — Prompt Fundamentals

- ☐ Can name the 4 useful parts of a prompt
- ☐ Compared a vague vs. specific prompt on a real problem
- ☐ Understands iteration as the normal workflow

Session 2 (2h) — Examples, Roles & Output Formatting

- ☐ Can explain zero-shot vs few-shot
- ☐ Used role framing and described its effect
- ☐ Successfully requested a specific output format

Session 3 (2h) — AI for Documentation & Code Assistance

- ☐ Generated + personally verified AI-assisted documentation
- ☐ Used AI for a targeted code review and checked the result
- ☐ Can explain why hardware-adjacent code needs extra verification

Session 4 (2h) — Iterative Refinement & Fact-Checking

- ☐ Ran a full draft → critique → revise loop
- ☐ Independently fact-checked one AI-generated claim
- ☐ Can name a task category needing mandatory verification

Session 5 (2h) — Capstone: End-to-End Report Workflow

- ☐ Produced one full structured status report from other prep-pack material
- ☐ Used 3+ techniques from Sessions 1–4 together
- ☐ Fact-checked every technical number in the report
- ☐ Can explain when to lean on AI vs. verify manually

Ready for AI 활용 internship prerequisite when all boxes above are checked.
